

Project Demo Planning

Date	20 July 2026
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain the farmer's crop-selection challenge	2	Jagadeeswari
2	Solution Overview	Walk through the ML pipeline and architecture	3	Manjusha
3	EDA & Preprocessing Walkthrough	Show key plots and preprocessing steps	2	Jagadeeswari
4	Live Feature Demonstration	Enter sample N/P/K/climate values, show live prediction	4	Manjusha
5	Model Evaluation Results	Present accuracy/classification report of best model	2	Jagadeeswari
6	Q&A Session	Answer evaluator questions	3	Full team

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Set context before diving into the technical solution
2	Solution Overview	Reference the Solution Architecture diagram
3	Live Feature Demonstration	Use 2-3 pre-prepared input examples for reliability
4	Q&A Session	Anticipate questions on model choice and accuracy
